### 📄 PROFILE

I am a student at VIT Vellore, currently pursuing my Master's degree in Artificial Intelligence after completing my undergraduate studies at the same institution. I have worked on several freelancing projects in web and app development, leveraging modern AI tools to enhance the development process.

### 🧠 SKILLS

#### Web Development

React.js ,js  
WordPress Development  
Bootstrap / Tailwind CSS

#### App Development

Android Studio (Java/Kotlin)  
Flutter,React Native

#### AI-assisted development

Problem Solving & Debugging  
Rapid Prototyping with AI (10x faster)  
Freelancing & Client Delivery

### 🌐 CONNECTIONS

### 📁 PROFESSIONAL EXPERIENCE

#### Freelance Web & App Developer

*Self-Employed | Remote | Jan 2023 – Present*

Designed and developed **e-commerce websites** with secure checkout, product catalogs, and responsive UI.

- Built **personal portfolio websites** for professionals and agencies using **WordPress and React**, optimized for performance and SEO.
- Developed **educational apps** and a **karaoke app** using **Android Studio and Flutter**, focusing on engaging UI and smooth functionality.
- Leveraged **AI tools ( prompt engineering)** to accelerate development, enabling delivery up to **10x faster** while maintaining quality.
- Customized **WordPress themes and plugins** to meet unique client requirements.
- Collaborated with clients to analyze needs, provide progress updates, and deliver scalable, user-friendly solutions.

### 🎓 EDUCATION

#### Masters in AI and ML

vellore institute of technology

Present | VIT Vellore

#### Bachelor of computer application

vellore institute of technology

2022 – 2025 | VIT Vellore

### 📁 PROJECTS

#### InnovateMate – AI-Powered Collaborative Platform

🎓 College Project VIT Vellore | 2024

- Built a **scalable modular system** with React.js + Tailwind (front-end) and Node.js + Express (back-end) connected via REST APIs.
- Used **MongoDB Atlas** for cloud-hosted NoSQL storage with optimized collections and indexing.
- Implemented **real-time chat and appointment updates** using WebSockets.
- Developed an **AI recommendation engine** with NLP/ML for expert-user matchmaking.
- Secured the platform with **JWT, OAuth, CORS, and encryption**.
- Integrated **Google Translate API** and **SMTP services** for global reach and reminders.
- Deployed using **Netlify/Vercel (front-end)**, **Render (back-end)**, and **MongoDB Atlas** with caching & load balancing.
